Source: Governor's Office of Planning and Budget--Demographic and Economic Analysis Section, UPED Model System.
This is the provisional 2000 Baseline, revised December 13, 1999. The last year of historical data is 1998 for employment and 1999 for population.
Total population is the population in households plus the population in group quarters. Persons per household is population in households divided by the number of households.
Populations are dated July 1.

This is the provisional 2000 Baseline, revised December 13, 1999. The last year of historical data is 1998 for employment and 1999 for population.
Total population is the population in households plus the population in group quarters. Persons per household is population in households divided by the number of households.
Populations are dated July 1.

This is the provisional 2000 Baseline, revised December 13, 1999. The last year of historical data is 1998 for employment and 1999 for population.
Total population is the population in households plus the population in group quarters. Persons per household is population in households divided by the number of households.
Populations are dated July 1.

This is the provisional 2000 Baseline, revised December 13, 1999. The last year of historical data is 1998 for employment and 1999 for population.
Total population is the population in households plus the population in group quarters. Persons per household is population in households divided by the number of households.
Populations are dated July 1.

This is the provisional 2000 Baseline, revised December 13, 1999. The last year of historical data is 1998 for employment and 1999 for population.
Total population is the population in households plus the population in group quarters. Persons per household is population in households divided by the number of households.
Populations are dated July 1.

This is the provisional 2000 Baseline, revised December 13, 1999. The last year of historical data is 1998 for employment and 1999 for population.
Total population is the population in households plus the population in group quarters. Persons per household is population in households divided by the number of households.
Populations are dated July 1.
