Introduction

Introduction

On April 1, 2000, the U.S. Census Bureau conducted the 22nd national census. The decennial census is the only national survey providing consistent, uniform measures and data for every geographic area in the nation. The results capture a picture in time of the population of Utah; who we are, how we've changed, and the direction we are heading -- demographically, socially, and economically.

Age Distribution in Utah. *Age Distribution in Utah* is the second in a series of Census 2000 Briefs to provide detailed analysis of the Utah Census 2000 data. This report contains tables and figures showing current age data for Utah, its counties, cities, and census designated places. Lower level geography, such as census tract, block, and block group data is available from the U.S. Census Bureau but has not been included in this publication.

This publication is divided into four sections according to geographic level. The first section of this report presents age detail and comparison by state, followed by a more detailed demographic analysis of age data for the state of Utah. The second and third sections include age data for Utah's counties and cities. Selected age groups, single year of age, median age, race and ethnicity by age, and percentage of total population are among the tables presented. City and county rankings have also been included in these sections. The last section of the report provides users with selected age groups, median age data, and rankings for Utah's census designated places.

Selected Age Groups. For many of the tables in this report, the data are presented for selected age groups. The selected age groups match the age groupings that are most frequently requested by data users. Other age groups can be tabulated on request or by using the single year of age data.

The following is a list of the commonly used selected age groups and a short explanation of each group.

Group: Ages 0-4 years
Criteria: Children less than school age

Group: Ages 5-17 years
Criteria: School age (K-12) population

Group: Ages 18-29 years
Criteria: Young labor force participants, along with the vast majority of higher education students

Group: Ages 30-54 years
Criteria: Majority of adult labor force participation

Group: Ages 15-44 years (female)
Criteria: Child-bearing age population

Group: Ages 55-64 years
Criteria: Early retirement population

Group: Ages 16-64 years
Criteria: Working age population

Group: Ages 65+ years
Criteria: Normal retirement population

Single Year of Age. Data by single year of age for ages 1 to 99, and age groups 100 to 104, 105 to 109, and 110 and over, comprise the single year of age tables in this report. On the state level, single year of age data is also listed by sex. Smaller level geography age data by sex is available on the U.S. Census Bureau's web site (www.census.gov).

Race and Ethnicity. As a result of revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses. This is true for race and ethnicity data for all geography levels.

State of Utah

Utah continues to be the youngest state in the nation with a median age of 27.1, compared to the nation's

median age of 35.3. As a percent of total state population, Utah has the largest percentage of 0 to 4 year olds, 18 to 29 year olds, and the second largest percentage (behind Alaska) of 5 to17 year olds. In contrast, Utah has the smallest percentage of 30 to 54 year olds, 55 to 64 year olds, and the second smallest percentage of people age 65 and over (behind Alaska).

Age data by sex is available in this report on the state level for selected age groups as well as for single year of age. Limited historical age data (1970-2000) is available in this section by sex for selected age groups and as a percent of the total population in Utah. State race and ethnicity by selected age group and as a percent of total population are included in the report.

Utah's Counties

Utah County boasts the state's youngest population with a median age of 23.3, followed by Cache County (23.9) and Iron County (24.2). Daggett and Piute Counties have the highest median ages in Utah, 39.2 and 38.9 respectively.

Single year of age data, selected age groups, race and ethnicity data, and selected age groups ranked as a percent of total county population are available by county. Sex data by county is available from the U.S. Census Bureau, but has not been included in this publication.

Utah's Cities

Hilldale City is the youngest city in the state with a median age of 13.1, followed by Rocky Ridge Town (13.6), Cedar Hills Town (18.5), and Alton Town (19.5). Cities with the highest median age in the state include Ophir Town (54.3), Scipio Town (46.5), Castle Valley Town (45.0), and Scofield Town (45.0).

In the "Population for Selected Age Groups by City (Listed by County)" table, beginning on page 66, the balance of county figure consists of those areas that are not incorporated, but are located within county boundaries. Estimates given in the footnote of this table are made by the Utah Population Estimates Committee, and are not from Census 2000. These estimates have not been included in the Census 2000 tables in this publication.

Utah's Census Designated Places (CDPs)

Section four contains age detail by census designated place (CDP). A CDP is a statistical entity comprising a dense concentration of population that is not within an incorporated place but is locally identified by a name. CDPs are delineated cooperatively by state and local officials and the Census Bureau, following Census Bureau guidelines. Beginning with Census 2000, there are no size limits for CDPs.

Additional Information

American FactFinder. American FactFinder (AFF) is a dynamic search feature on the U.S. Census Bureau's web site that allows users to access Census Bureau data quickly and easily.

AFF offers data from Census 2000, the 1990 Decennial Census, the Economic Census, and the American Community Survey. To access American FactFinder go to factfinder.census.gov or go to the Census Bureau's web site (www.census.gov) and click on A or American FactFinder.

State Data Center. Electronic versions of tables and figures in this report are available by contacting the Utah State Data Center staff at (801) 538-1036. Census 2000 data for the state of Utah is available on the Demographic and Economic Analysis web site: www.governor.state.ut.us/dea. Census Briefs will be posted (in pdf format) to this site as they are available.

Note: As a result of the revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses.

Note: As a result of the revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses.

85 years and over	101	101	100	1	0	0	0	0	0	0	100

Note: As a result of the revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses.

Note: As a result of the revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses.

85 years and over	316	312	309	0	1	1	0	1	4	3	307

Note: As a result of the revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses.

Note: As a result of the revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses.

Note: As a result of the revised standards for collecting data on race and ethnicity issued by the U.S. Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. Respondents that selected more than one race in 2000 are included in the "Two or More Races" category. Race data from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses.

*The Utah Population Estimates Committee provided April 1, 2000 population estimates for the following areas: Hanksville (missed by Census Bureau), 240, resulting Balance of Wayne County, 986; Hooper (from CDP to incorporated city on November 30, 2000), 4,081, resulting Balance of Weber County, 13,694; West Jordan (annexation), 78,714, resulting Balance of Salt Lake County, 199,264. In the case of West Jordan, only the annexation increment of 10,378 impacts the Balance of County figure. These estimates are not included in the Census 2000 age data in this publication.

**PCT (Population Subjects Summarized to Census Tract Level) Series Tables, including single year of age data, are not available for blocks or block groups. Therefore, age group 16-64 could not be calculated for Green River City which is divided between Emery and Grand Counties.
